These sample reproductions are an approximation of color and do not denote the actual texture or sheen and vary according to material type and specific batch. Colors also vary depending on lighting conditions, substrate and exposure. CLEAR-SEAL™ is optional per our specifications and will slightly deepen the color. Any additional coats applied beyond the recommended coverage rate will continue to deepen the color. When color matching is critical, an applied sample is required and all materials should be from the same batch. Please note, colors ending in "A" are subject to a 20% deeptone fee.
